

“Open study on the topical treatment of interdigital fungal infections in diabetic patients.” (Johansson)

- **Objective:** Investigate the effectiveness of a non-pharmaceutical treatment of fungal skin infections in diabetic patients using Sorbact® ribbon gauze.
- **Method:** Daily application of Sorbact® ribbon gauze for 10 days on 20 patients with previous interdigital infections, for which topical antifungal pharmaceuticals were given.
- **Results:**
 - Sorbact® ribbon was an effective treatment for interdigital fungal infections in diabetic patients.
 - 75% of the infections had improved or healed after 10 days of treatment.
 - 55% of patients showed no growth of fungi after 10 days of treatment.
 - The dressing easy to apply.
